

New configuration of **HSV700** manual slide valve

For valves with
CETOP pattern
the **adapter plate**
will be delivered
separately

Our valve series HSV700 will be simplified in order to enhance its overview. The model for the NG6 CETOP version consisted of a valve for manifold assembly and a CETOP adapter plate, which were offered only as a complete set.

We now offer only two instead of three different mounting versions. To achieve the CETOP option, the manifold version is now combined with a separately available adapter plate.
